**ZOONOSES
ONLINE
EDUCATION**
WWW.ZOEPROJECT.EU

Online courses with videos for the field of veterinary communication dealing with prevention, diagnosis and treatment of diseases transferable from animals to humans

Erasmus+ Programme
Strategic Partnerships for higher education
Ref. no.: 2016-1-RO01-KA203-024732

VETERINARY MEDICINE

- Analysis on zoonoses state of arts in 4 countries: Romania, Croatia, Lithuania, Italy.
- Collection of best practices on zoonoses interventions.
- Guide of malaria & dirofilariasis infectious disease transmitted from non-human animals to humans.
- Videos capturing zoonoses bio-manipulation in simulation centers.
- Online course on malaria and dirofilariasis study in 6 languages.

LANGUAGES

- Medical communication linguistic resources for veterinary in 6 languages (EN, RO, FR, CRO, LT, IT).
- Online language course for the veterinary field addressing 6 languages.

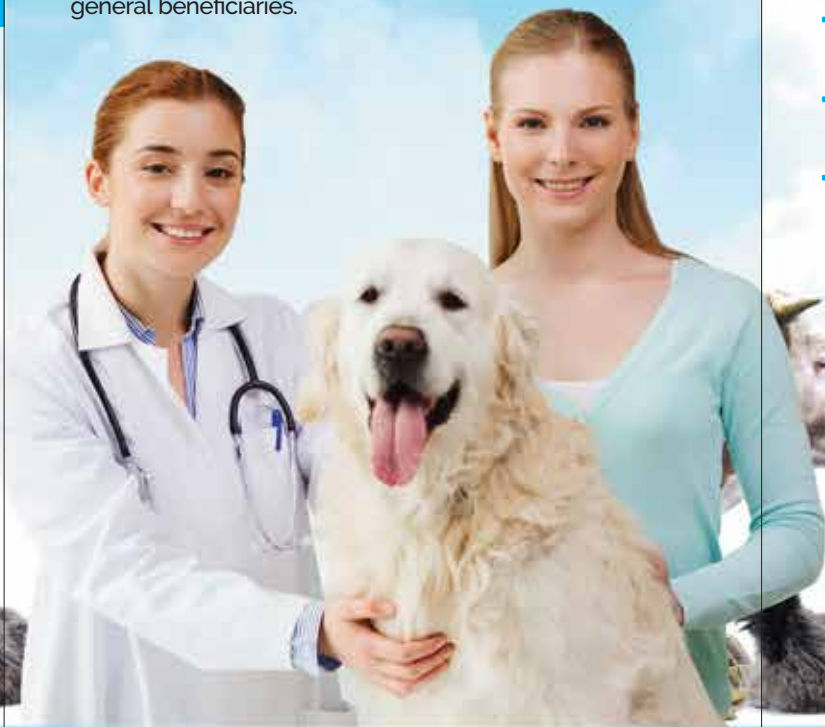

ABOUT ZOOSES

The term is from Greek: zoon "animal" & nosos "disease". "Diseases and infections which are naturally transmitted between vertebrate animals and humans". Definition according to World Health Organization, 1959.

AIM OF THE PROJECT

ZOE project aims to create open digital educational resources in the field of veterinary medicine based on developing innovative guidelines on study of infectious disease transmitted from non-human animals to humans.

By involving veterinary, medical, pedagogical, linguistic and training actions, ZOE project will raise awareness on the importance of effective intervention related to identify, monitor and control malaria and dirofilariasis as one health approach, useful for the academic, professional and general beneficiaries.

HUMAN MEDICINE

- Guide about zoonoses and human impact.
- Synergies between the human & non-human medicine.
- Protocol on epidemiological monitoring and control of zoonoses.
- Informative materials for general public.
- Network of medical institutes.

TRAINING

- Guide about zoonoses and education impact.
- Pedagogical Guidelines & Piloting for teaching/learning of children aged 6-12 .
- 2 Rounds of blended training for trainers & learners in the field of veterinary.
- Trainings with students and specialists from human medicine to be trained in the used and applicability of the protocol for epidemiological investigation in the hospital
